EXPERIENCE

Creative Services and Publications, UCSD, La Jolla, CA

Student Web Developer

Apr 2018 – Present

- Assisted the redesign of UCSD's Career Center website with HTML and CSS
- Enhanced the ExpressionEngine CMS with automatic email notifications using PHP and cron scheduling
- Design and convert mockups into web pages and flow content into existing websites and electronic invitations

Foxconn Technology Group, Shenzhen, China

Web Development Intern

Jul – Aug 2017

- Developed five webpages with Java EE and Oracle PL/SQL, built on Apache Tomcat server
- Assisted the Java web development team by implementing drag and drop effects and interactive charting
- Coordinated with team development standards and agile software development
- Performed cross-browser testing for functionality and style

PROJECTS

ServiceNow Newsletter

Feb 2019

- Developed an Angular web application, displaying ServiceNow's latest mentions in articles and stock price.
- Used AWS Lightsail for hosting, NewsAPI and Alpha Vantage for fetching live data.

FlyerFighter

Dec 2018 – Present

- Manage and assist the development of the student event React-MongoDB web application, hosted on Heroku
- Organize weekly development meetings and merge progress at code review
- Consult with UI/UX for advice and feedback for improvements
- Persuaded members to communicate via Slack and manage tasks on Trello

FamiyFriendly

Sep – Dec 2018

- Developed a front-end web application to enhance communication and activities among family members
- Utilizing HTML, CSS, JavaScript, Web Storage, and Google Maps/Places API

UCSD Flyers

Jan – Mar 2017

- Developed a student organization promotion platform with React, Redux, and Firebase
- Coordinated use cases, user stories, and requirements

STUDENT INVOLVEMENT

Chinese Computer Community, UCSD, La Jolla, CA

Technical Chair / Project Lead of FlyerFighter

Sep 2018 – Present

- Guide organization members in startup projects with technical support
